Adding Audio to the Voice Track(s)

You have several options for adding audio to your project:

- Drag and drop an audio file (mp3, wav, aiff, aac) directly from your desktop to your voice track.
- Import from your iTunes library through the media browser.
- Record directly into GarageBand. This option requires a computer with a built-in or USB microphone. (See last page for Microphone Input Settings).

A) drag/drop:

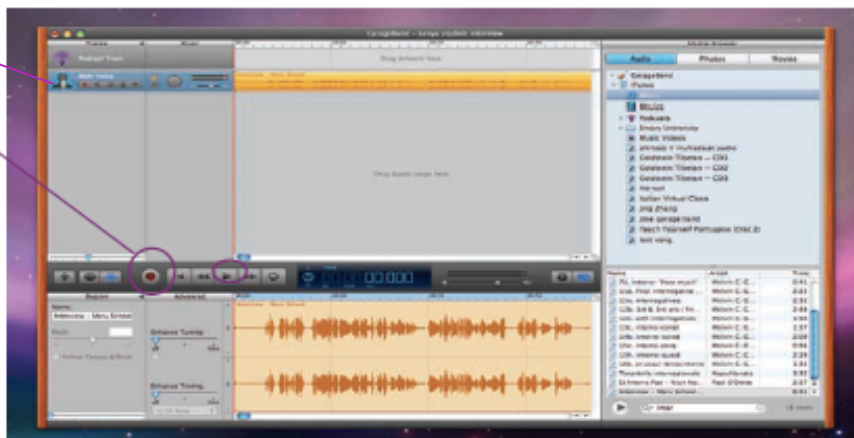

B) iTunes:

C) Record:

You will be recording your podcast. First, click to select and highlight the track.

To record, click the record button and speak into the mic. To stop recording, click the record button again. You'll notice the play head continues to move. To stop play, click the play button. Recorded tracks will be purple in color.

5

Adding Jingles

You may add copyright-free music tracks to accompany your podcast episode. These jingles could be used to create a musical introduction to your podcast episode.

1. Click on the  to open the sound effects panel. Select "jingles".
2. Listen to options by selecting themes and then individual jingles.
3. To add jingles to your podcast, click and drag to your jingle track.

******You may add 3-5 Jingles to your podcast including music at the intro and to wrap-up. Be creative!***

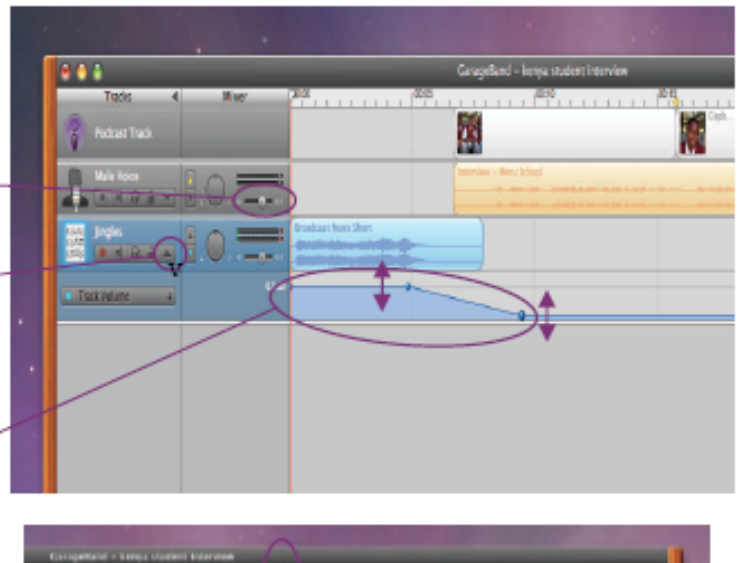

6

Editing Jingles/Audio Volume

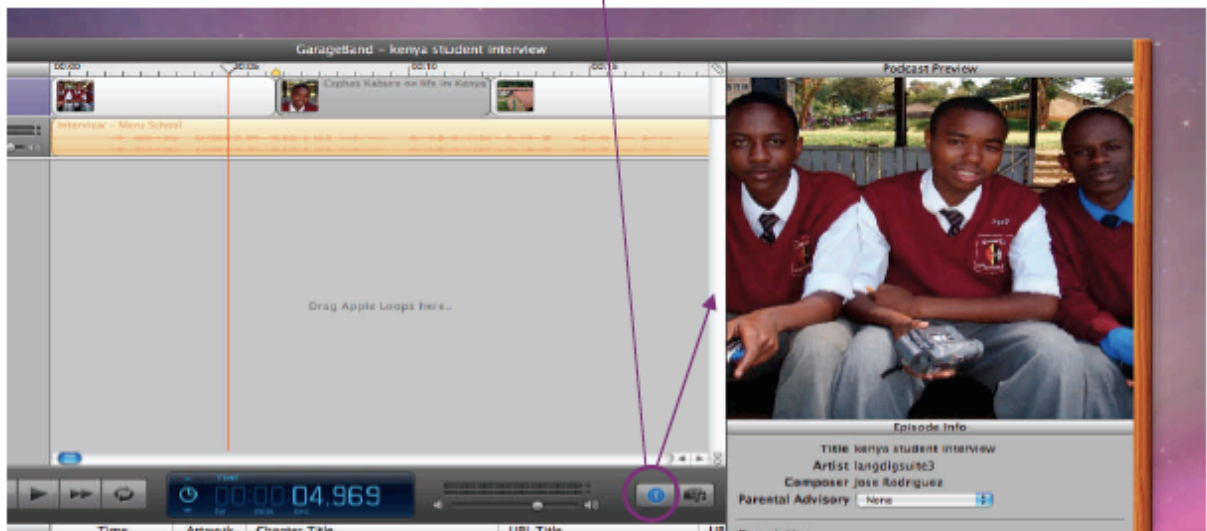

To adjust the master volume and levels for the entire podcast episode, adjust here.

For more specific volume adjustment, click on the down arrow to open volume control for the track.

Clicking on the volume control will create audio nodes which allow you to increase/decrease volume for sections of your track: fading in/out.

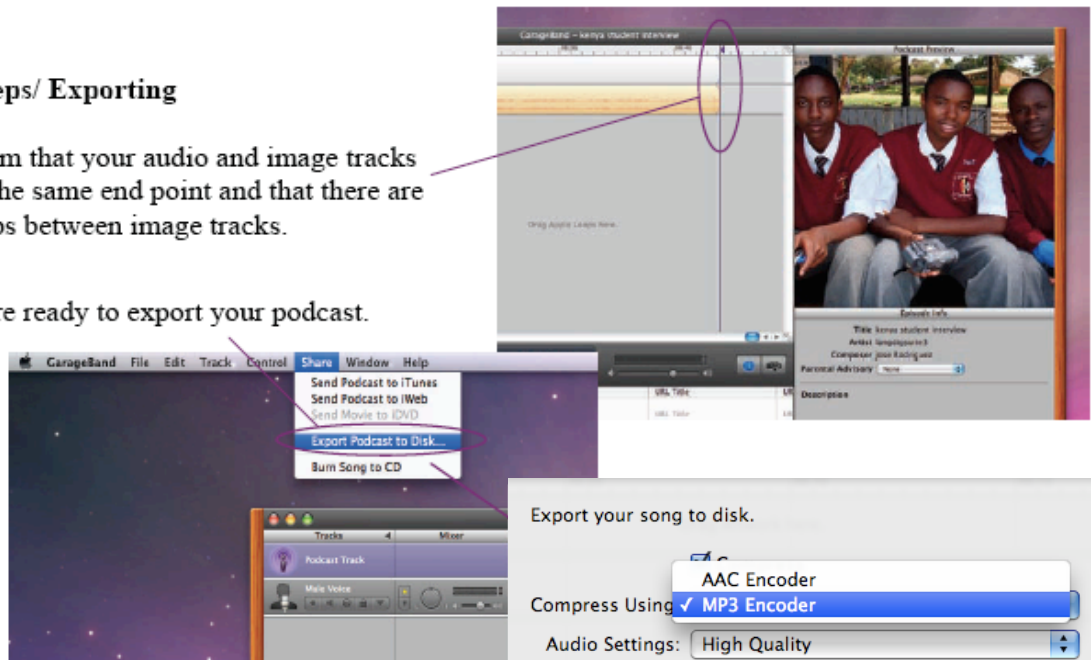

- 7** **Previewing your podcast episode**
To view your project so far, click on the  next to media browser to open the preview pane. Click the play button to review.

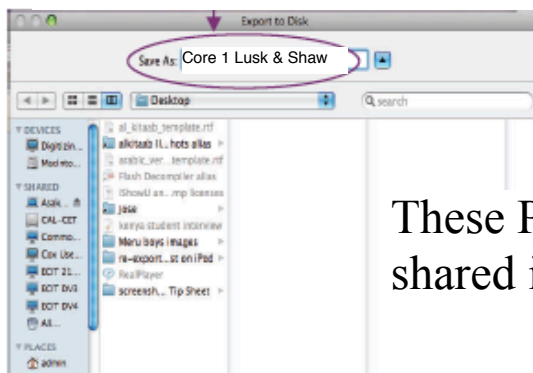

8 Final Steps/ Exporting

1. Confirm that your audio and image tracks have the same end point and that there are no gaps between image tracks.
2. You are ready to export your podcast.

3. Save your podcast on the desktop. Be sure to save your file as Core _last names.

These Podcasts will be uploaded and shared in Moodle. Great work!
